

NOTICE

The State of California has determined that the release of R-134a, the refrigerant used in your car's A/C system, contributes to Global Warming.

It is your responsibility to understand proper re-charging techniques before servicing your vehicle's air conditioner. Resources available to you include:

- Product Label Instructions
- Your Store Sales Associate
- "The Do-it-Yourself Guide to Proper A/C System Recharging" brochure
- On the Web: www.rechargeac.com

Effective January 1, 2010, California law requires all purchasers of small containers of refrigerant marked for deposit and return to pay a \$10.00 per container deposit at time of retail purchase and return all purchased, used containers for recycling within 90 days to the retailer where purchased for a \$10.00 per container refund with valid proof of purchase.

It is illegal to destroy or discard used or unused small refrigerant containers under Section 95360 *et seq.* of the California Code of Regulations.
